1 Each family line is presented as a section or subsection of this book. For example subsection 1.3.5.1 is devoted to (reading from right to left) the first child of the fifth child of the third child of the original Robert Slimmon. These numbers, along with the corresponding names and birth years, appear in the footer of each page. Page numbering is restarted at 1 for each section or subsection. This makes it possible to add new photos or information to a subsection without having to renumber the entire book or even the section.

2 Each family member has been assigned a unique index # in brackets () for reference purposes only. These reference numbers facilitate look-ups for subsequent additions and changes to the master genealogy data-base.

3 The birth year has been indicated with each name to help differentiate between all the 're-cycled' names.
